Create a Compound MIDI events to perform any task, (if using MIDI KB or keyboard) from one note to multi- note, multi- event. For example, to play a song from chord-E to D, you can send a command from one-key: E5 6 - 7 G# This is a compound event which consists of three notes: E5, 6 and 7 plus G#. It may be useful to play chord in advance. The note 6 corresponds to the command "Sustain" and the seventh note to "Release" the command "Release" and "Sustain" together is "Release, Sustain" This is a compound event consisting of one-key: E5, "Sustain" and one note 7 "Release, Sustain" to play a song from chord-E to D You can repeat the command "Sustain" and the seventh note to "Release" This is a compound event consisting of two-keys: E5 6 and 7 6 and 7 This is a compound event consisting of three-keys: E5 6 - 7 G# If you want to change the speed of an event, you can change the percentage. You can also add a pitchbend effect. Using Pitchbend, you can make a keyboard sound a little louder and softer. You can use the key "Knob-range" to change the range of the Pitchbend. This editor allows to read the "audio annotation" type format (AAT) file and to edit them with possibility to save new version of the file. It is required that AAT file is put in a folder with corresponding audio file, and that it is called with the suffix "AT". The program can read and edit the following files: * AAT, AAT1, AAT2, AAT3 * AAT, AAT1, AAT2, AAT3,.AAT3 extension * AAT, AAT1, AAT2, AAT3,.AAT3 extension, in the same folder as the corresponding audio file * AAT, AAT1, AAT2, AAT3, AAT3, AAT3,.AAT3 extension * AAT, AAT1, A 70238732e0
