Aug 31, 2016 While it's great for the ability to develop applications that will run across Windows, iOS, Android and Mac OS X, Delphi is not as flexible as Visual Basic or C# when it comes to embedding web pages into your. Also you can't develop HTML5 web applications with the Delphi IDE.Q: 'ISupportInitialize' interface implementation I am trying to build a custom InitializationContainer for the aspNetlifetools but keep running into this error, which I could not find on any other site. I have a interface with some methods to initialize and open properties. When I implement this interface, I get the error: Error 3 'ISupportInitialize' does not implement interface member 'ISupportInitialize'. 'ISupportInitialize' cannot implement 'ISupportInitialize' because it does not have the matching return type of 'System.Void'. public interface IInitializeContainer { void Initialize(); void Open(string fileName); } public class MyInitializeContainer : IInitializeContainer { void IInitializeContainer.Initialize() { } void IInitializeContainer.Open(string fileName) { } } A: It is very easy - your implementation of the interface should have the same return type, 2d92cc491b
