An Urban History of Photography: From the earliest hand-cranked exposures to daguerreotypes, etchings, and the birth of mass media, Bill Bishop reveals how a unique lens shaped America. From the 1820s to the 1880s, photography had a broad appeal as a new mass medium. The emergence of the daguerreotype, the easel picture, the stereoscope, and the Kodak camera helped shape the identity and ambitions of Americans. And it was the American photographer who, more than any other single person, defined the American dream in a new way. Advertising Read more Rio de Janeiro (AFP) Towering pylons on the dusty roads of Rio de Janeiro's periphery stand empty, a reminder of the day when the ambitious project to build a massive Olympic park and its associated sporting facilities was set in motion.

While the venues are still a few years away from being completed, the state of Rio has thrown up a major stumbling block -- building more than 20,000 dwellings to accommodate the estimated 5,000 migrant workers who will build the Olympic Park. Brazil's federal housing ministry is reviewing building plans for the Rio Olympics, with the role of the state of Rio in the planning process raising questions of legality. Olympic construction in Rio began at the height of Brazil's economic boom, which helped send unemployment down below six percent and the country's economy rocket to one of the world's fastest-growing. But the economic slowdown has seen the Olympic facilities project running behind schedule, with the state of Rio unable to finance the build itself. With an annual deficit of 16.3 billion reais (\$4.74 billion) the state's coffers have been drained by the cost of the Games. - Infrastructure shortage - This, in turn, is preventing the government from investing in infrastructure such as roads and power lines, with Rio
