How to copy multiple files from one folder to another? How can i copy files from one folder to another without getting error like i said earlier? Here's my code: #copy import os import shutil def rename_list(): shutil.move('C:\files\test1', 'C:\files\test2') Rename_List() I'm getting the error here as: FileNotFoundError: [Errno 2] No such file or directory: 'C:\files\test1' A: I'm not sure, but I suspect this line is the culprit. os.rename('C:\files\test1', 'C:\files\test2') It is probably trying to rename C:\files\test1 to C:\files\test2, when what you want it to do is rename C:\files\test1 to C:\files\test2. 5 People who find this book useful These Reviewers found this book useful We found that this book was used in.
