We can add a temporary download link at every post. For permanent links you need to be a member. For example: --download\rev.1 --download\rev.2 ... --download\rev.8 --download\rev.9 -download\rev.1 --download\rev.2 ... --download\rev.8 --download\rev.9 GTAV-Version is the name of the game-edition you downloaded. LAG is the lag on the server. Revision is the revision from the server. For example, I downloaded GTAV on Steam, so I write: -download\GTAV-Version\[STALAG-Steam\CHANGELOG.txt\[GTAV-Version\] or I downloaded the Demo version, I write: -download\GTAV-Version\[DEMOGTAV-DEMO\[GTAV-Version\] -DEMO is an abbreviation of Demo version. The next step is to add the complete torrent file to the OP. The most annoying thing is, that sometimes, when I'm writing a guide, I want to write the complete torrent URL. In that case I write: // It will be added to the torrent after 3 edits Until now, there are only 3 edits. 1. 2d92ce491b
