It took a while, but finally Luke Bryan's 'Crash My Party' is ready for the world. The Carolina native's sixth studio album debuted at No. 1 on the Billboard 200, selling 287,000 copies (out of nearly 2.6 million), since its release on Aug. 29. The album's top-selling single, "Crash My Party," sold over one million digital downloads in its first week, and over 2.1 million total digital copies, including both the single and video package, reports Billboard. Other singles include "Everybody" and "Mofo," which both peaked at number one on the country chart. "Party Like It's 1929," "Make a Little More Room" and "Tattoos on This Town," are the other singles available. Bryan's new album also boasts guest appearances from others who have made their way to Nashville, such as Jason Aldean, Blake Shelton, Kacey Musgraves, Blake Boyles, John Rich and Rascal Flatts. Bryan tells Rolling Stone, "I said, 'I can't figure out what I need to do. I'm doing what I do, and it's good, but it's not great.'" Bryan says he wanted to create a "modern country album" that's more "of the present," thus the working title of the album, "Crash My Party." Bryan says, "I wanted to come at it like, 'Hey, we get to be in a party, let's have fun.'" "I felt like I just needed to make a little more room, and it just worked. It was my favorite record in the world to make." The 'Crash My Party' video was directed by Justin Nunez, and the video is filmed using the voice of Luke's wife, Caroline, along with scenes of the song. According to Bryan, the song is about living in a house with a lot of friends and family, and having fun. Bryan's new album is his first studio album in two years since his album 'Crash My Party' was released in November 2012.

A: Create multiple virtual columns for each route, one for each set of routes. Then write out your result. select route, route\_num, row\_number() over (partition by route\_num order by id) as rnk, id, date from get\_all\_tickets If you're going to have the routes shared, you need a new select statement that doesn't share the route column. I suspect what you want is something like this: select t.ticket\_id, t.initiated\_by, t.initiated\_date, t.out\_of\_ticket\_state, t.expected\_completion\_date, t.deleted from get\_all\_tickets t, (select min(id) as min\_id, max(id) as max\_id from get\_all\_tickets group by route\_num) t where t.id >= (select min(id) from get\_all\_tickets group by route\_num) and t.id <= (select max(id) from get\_all\_tickets group by route\_num) U.S. Pat. No. 6,949,101, "System and method for automatic determination of symbol length for signaling", granted to R. I. Tal, et al., the contents of which are hereby incorporated by reference, describes a process for generating a length 3e33713323
