KEYMACRO is a simple utility to assist in allowing your desired keyboard shortcuts to function on multiple programs. Most keyboards have an assigned function to most of the keys but if you have a complex keyboard and require the use of some specific keys, you can't necessarily assign a predefined shortcut to the program that you're working with. This allows you to assign multiple keyboard shortcuts to one particular program, for instance, as I may need to run multiple programs with a few different shortcuts, this is great because I don't have to adjust the shortcuts each time I start a new program. You don't have to be too computer savvy to use KEYMACRO, all you need to do is press a few buttons and you'll be on your way.
