MediaRescue Pro PC/Windows

MediaRescue is a free powerful and easy-to-use data recovery software for Windows. 4. kUNzip Password Recovery Pro - Utilities/File & Disk Management... kUNzip Password Recovery Pro is a handy password recovery tool for UNZIP-format compressed file archives. Using this simple utility, one can remove or change the password of an archived file. If the archived file cannot be opened, the password of the archive can be changed with the help of the provided code editor. When the archive cannot be opened anymore, one can remove the password from the archive's header. kUNzip Password Recovery Pro can remove, replace and change the password for archives created by most popular archiving tools, including 7-Zip, WinZip, WinRAR, TAR, ZIP, GZIP and more.... 5. KazyPassword - Utilities/Security & Encryption... KazyPassword is a free password recovery software for Microsoft Windows, allowing you to change the passwords for the following Microsoft products. Listed are passwords for Windows, Windows Media Center, Windows Mobile, Windows Server, Windows Vista, and Windows XP. KazyPassword automatically searches the registry for all passwords stored in the Microsoft registry and recovers them. With the recovered passwords you can use your favorite web browser to change the passwords of the above mentioned products.... 6. TrueCrypt - Utilities/Backup & Restore... TrueCrypt is a free open-source disk encryption software for Microsoft Windows that can create encrypted volumes. Like other disk encryption software, TrueCrypt encrypts user data and files to ensure that data remain secure. If one of the TrueCrypt's encrypted volumes becomes damaged or deleted, data on that volume can still be decrypted. TrueCrypt supports password protection and TrueCrypt Volume Recovery.... 7. Forced Password Recovery - Utilities/Security & Encryption... If you have lost or forgotten your password to any encrypted file, you can use Forced Password Recovery to recover the password. Any password of the encrypted file can be recovered by it with the help of the encoded password list. Forced Password Recovery helps you recover files by forcing recovery using a user defined password or a series of predefined passwords. In order to recover the password of an encrypted file you have to provide the encoded password list. If the password list is not available then the program generates a random password and uses it to recover the encrypted file. The passwords can be entered as

What's New in the MediaRescue Pro?
