Name (required) Mail (will not be published) (required) Website You can use this code: Please enter code above Useful Resources Sites like Media Library are really convenient for users. If the file is in a library or some folder where you can't access it, you can use this feature to search for a file in Media Library. It will also be easy to use if you want to access some file that is hidden in a folder with subfolders. Select the file you need from the Search Results that are listed on the right. Select the file that you need and right click on it. Click on "Copy to this location" to copy the selected file to your desktop or clipboard. You can choose any place in the Clipboard and Paste. For example, you can paste the file in the Download page of a torrent site. About Torrentz2 is a popular search engine that provides search results of torrent files. The website was launched on March 22, 2001, and search results were made possible by the use of a Google custom search engine. The website is available in 14 languages and can be accessed through a mobile application as well. Torrentz2 is a subsidiary of the popular RARBG search engine and is now owned by BigHook. The website is provided in a free version as well as a premium version with extra features such as custom page ranking. The website has a number of achievements, including the "Best of 2014" award by CNET. Features Torrentz2 can be accessed via the website, mobile application, and various desktop apps. There are numerous features in the Torrentz2 website such as the download section, browse section, search section, and the server section. The download section allows users to search for a torrent file and then access it directly through a downloader. The browse section allows users to browse various types of files such as torrents, documents, movies, games, software, etc. The search section allows users to search for torrent files or other kinds of files. The search results are categorized into different tabs such as Torrents, Direct Links, and Indexed. The server section allows users to add a custom RSS feed or
