Autocad 2003 Autocad 2002 : Released in August 2002, Autocad 2002 was the first version to be developed using the .NET framework and introduced AutoCAD Architecture and has the ability to operate from within a model. Autocad 2002 was also the first version to be released for the Mac platform. Autocad 2002 added a new Import and Export dialog box with many new features, including creating DWG files from Word documents. All editions of Autocad 2002 work with the previous version of Autocad (Autocad 2000) by upgrading from Autocad 2000. Autocad 2005 Autocad 2005 introduced the building blocks for creating a fully scalable, managed applications that would scale to large deployments of AutoCAD users, at the same time maintaining the high level of technical support users expect. A key feature of the Autocad 2005 infrastructure is the use of Microsoft's .NET framework technology for creating the building blocks of AutoCAD applications. The release of Autocad 2005 introduced the first version of the AutoLISP language to support the new framework. Autocad 2005 introduced a new version of the DXF file format. The release of Autocad 2005 also introduced the first native AutoCAD.NET architecture - a native class based architecture for developing applications with AutoCAD. The first developer edition of AutoCAD.NET was released to registered Autodesk customers in February 2006. The AutoCAD 2005 platform consists of a multi-layer architecture for application development. The top layer consists of an API implementation that is common to all products. This API is implemented as an AutoLISP extension language, which is known as AutoCAD ObjectARX, and allows an application developer to program using a common programming interface in .NET. The AutoCAD ObjectARX API is implemented in several languages including Visual Basic, C++, C# and Java. AutoCAD 2005 introduced a new version of the DXF file format for AutoCAD. Autocad 2009 Autocad 2009 introduced .NET technology and technology that is compatible with third-party products including Excel, SQL Server, Visual Studio, Microsoft Office 2003 and Windows Server 2003.
