The web hosting company I use is Windows Azure and using IE10 on a Windows 8.1 system will fail at this site. Other sites hosted on Azure and run on IE8/IE9 work as intended. I'd like to hear if others have this issue. I have the same problem. I have a Windows 7 Pro system. Microsoft Edge works fine for other websites. Could you post your Azure connection string and the config file that has been created by Stylepix Pro installer? I will try to provide the necessary information required for this problem. My Azure account is a Windows Azure Storage Account, not a Virtual Machine. When I try to open my web application, I get the following message: "A connection was successfully established with the server, but then an error occurred during the pre-login handshake. (provider: Shared Memory Provider, error: 0 - The certificate is invalid. Expected X509Certificate2 pattern: . The certificate subject name does not match the name on the server certificate." To add an SSL certificate for the web server, I have added the following to my web.config file (in the system.service 77a5ca646e
