I have following scenario. I have a parent type that has three child types say ParentA, ParentB, ParentC. Now inside the Parent class I have two internal static members of type child that both are of type ChildA. I also have a method that does something with ChildA, but obviously doesn't change anything outside. Now I want to make sure that if I use ChildA in some other child, the same instance should be used. I tried using Attribute.PROPAGATE\_FIXED\_ATTRIBUTE, but this seems to be only propagating once. How do I go about to make it propagate twice? Sample code is as follows: [AttributeUsage( 570a42141b
